

Scientific Colloquium Goddard Space Flight Center

Permission for Recording

Goddard has facilities to record, archive, and broadcast Scientific Colloquium talks, allowing a larger audience to participate in these presentations. In order to protect the rights of the speakers, permission is required before any recording takes place.

I, John Degnan, an invited speaker for the Goddard Scientific Colloquium series, give permission for Goddard Space Flight Center to carry out the following (and only these) recording and archive activities (**Please check as many as apply**).

Video recording of the colloquium. The videos are archived in the Goddard libraries (one copy at Greenbelt and one copy at Wallops). They may be checked out for private viewing only by persons who have Goddard library cards.

Duplicate the video for educational institutions who make written requests. Such videos may be used only for educational viewing and may not be broadcast or distributed.

Record the videocast and make it available through a video archive available on the Goddard Web servers. Make the archive videocast available to:

the general public.

NASA Web sites only.

Goddard Web sites only.
